README: Personal Portfolio Website

File: `web acitvity based -1.html` **Author:** Hemant **Target:** Engineering Portfolio / Web Resume

Project Summary

A high-contrast, modern developer portfolio created to showcase engineering skills, academic background, freelance experience, and completed projects. Designed for fast client previews without external CSS or JS frameworks.

Quick Installation & Execution

```
# Clone or download repository git clone https://github.com/hemanth/web-activities.git # Navigate to project folder cd web-activities # Open in default browser open "web acitvity based -1.html" # macOS start "web acitvity based -1.html" # Windows
```

Core Structural Components

- **Smooth Anchor Navigation:** Instant jump links targeting internal section IDs (`#about`, `#skills`, `#experience`, `#projects`, `#education`, `#contact`).
- **Interactive Skill Badges:** Flex-wrapped pill elements with subtle elevation and border color transitions on hover.
- **Experience Timeline:** Structured resume entries with border-left accent indicators denoting career milestones.
- **Responsive CSS Grid:** Auto-fitting card containers that scale from single-column on phones up to three-columns on desktop displays.

> **Environment Compatibility:** Fully compatible with Chromium, WebKit, and Gecko engines. No npm packages or build systems required.

README: Adventure Trek & Camping

File: `web activity based -2.html` **Category:** Eco-Tourism / Outdoor Recreation **Status:** Release Ready

Project Overview

A commercial landing page and reservation portal tailored for trekking agencies and outdoor guide companies. Features rich imagery, detailed itinerary tables, gear checklists, and an integrated reservation inquiry form.

Execution & Usage Guide

```
      # Run directly via web browser start "web activity based -2.html" # Verify booking form interactions # - Test dropdown values (Green Valley, Forest Adventure, Summit) # - Verify checkbox selection in the Equipment panel # - Test mobile viewports using DevTools (Ctrl+Shift+I)
```

Key Architectural Modules

- **Tiered Route Showcase:** Displays hike packages marked with difficulty pills (Easy, Moderate, Difficult) and duration metadata.
- **Trip Itinerary Table:** Structured semantic `<table>` displaying dates, pricing, and expedition durations with alternating zebra striping.
- **Checklist & Safety Layout:** Dual-column utility panel providing hikers with packable gear checkboxes and emergency protocols.
- **Inquiry Booking Form:** Comprehensive HTML5 form inputs including participant counters, calendar selectors, and inquiry text areas.

> **Form Submission Note:** The inquiry form is pre-configured with `method="get"` for demonstration purposes and does not persist data to a live database.

README: Sweet Treats Bakery

File: `web activity basic -3.html` **Domain:** Local Retail / Food Service **License:** Educational / MIT

Website Scope & Purpose

A vibrant storefront webpage for an artisanal bakery. It focuses on driving local footfall, spotlighting daily specials, promoting event cakes (weddings and birthdays), and offering instant customer inquiry channels.

Viewing Instructions

```
      # Open locally in Google Chrome or Microsoft Edge google-chrome "web activity basic -3.html" # Click-to-contact testing: # - Click 'Call Our Bakery' to test 'tel:+919876543210' # - Click 'Email Us' to launch mail handler
```

Functional Feature Set

- **Seasonal Promotional Strip:** High-visibility coupon callout card featuring the promotional discount code `SWEET15`.
- **Menu Product Cards:** Flexbox catalog items with price tags in Indian Rupees (₹) and direct ordering anchors.
- **Custom Cake Orders:** Tiered bespoke cake offerings starting from ₹700 for birthdays and ₹2,000 for wedding tiers.
- **Bakery Visual Gallery:** Curated photo layout highlighting bakery specials and confections.
- **Direct Communications:** Native telephone protocol and mailto links for rapid mobile inquiries.

> **Asset Delivery:** Images are linked via Unsplash CDN. An active internet connection is recommended for initial image asset loading.
